DETAILED ACTION

Terminal Disclaimer

1. The terminal disclaimer filed on May 1, 2006 disclaiming the terminal portion of any patent granted on this application that would extend beyond the expiration date of United States Patent 6,712,108 has been reviewed and is accepted. The terminal disclaimer has been recorded.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the claims:

Claim 15 (new claim 1), line 3: the punctuation --,-- is added after the word "innerliner".

Claim 16 (new claim 6), line 3: the punctuation --,-- is added after the word "innerliner".

Claim 18 (new claim 3), line 4: the language "? and ?" is deleted.

Allowable Subject Matter

3. Claims 8-10 and 15-20 (renumbered 1-9) are allowed. The following is an examiner's statement of reasons for allowance:

Art Unit: 1733

The prior art of record recognizes the use of multiple reinforcing layers in the sidewall region of tires, as shown for example by Hoshino, Kono, Mezzanotte, and Deck. In particular, Hoshino, Mezzanotte, and Deck are directed to runflat tire constructions. In the runflat tire constructions of Hoshino and Mezzanotte, reinforcing cord layers are disposed within or embedded within a run flat insert to improve runflat performance. However, such reinforcement structures are not "disposed between two wedge inserts". Thus, the tires of Hoshino and Mezzanotte only contain a single runflat insert, as opposed to the multiple insert assembly of the claimed invention, having multiple reinforcing cord layers embedded or disposed within. One of ordinary skill in the art at the time of the invention would not have found it obvious to use the multiple reinforcing cord layers of either Hoshino or Mezzanotte to separate a pair of runflat inserts from one another. Regarding Deck, the reference teaches the placement of a reinforcing cord layer formed of metallic reinforcing elements between a pair of distinct sidewall runflat inserts, as best depicted in Figure 2. In this instance, though, the reference fails to suggest the use of two reinforcing cord layers in each sidewall and furthermore, the reference fails to describe the cord reinforcing layer as formed of two cross-biased fabric layers. Thus, it is evident that the prior art references of record failed to suggest, disclose, or teach the claimed runflat tire construction.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
